

Heritage CardGuard® 

TURN YOUR CARD ON & OFF *from your smartphone or tablet* CONTROL & MONITOR SPENDING

The Smart Way to Manage Your Heritage Bank Debit Mastercard®

- Turn your card off when traveling or when you've accidentally left it at the last place you used it.
- Discipline your household or business spending by setting spending limits.
- Set geographic restrictions on transactions.
- Monitor card activity by merchant category and by type of transaction.
- Block transactions for certain merchant or transaction types.
- Receive real-time alerts for debit card transactions, enabling card holders to quickly detect unauthorized activity.

Safe. Convenient. Fast.

How do I access CardGuard®?

1. Open the Heritage App*, select My Cards, tap on the link. If you've already downloaded CardGuard®, you'll be automatically signed in. If not, you'll go to an app store where you can download CardGuard®.
2. If you have not yet downloaded the Heritage App, look for it at your favorite app store. Then follow directions above to access CardGuard®.

What cards are eligible for Heritage CardGuard®?

You can use your personal and business Heritage Bank Debit Mastercards®.

Why Use CardGuard®?

- Turn the Heritage Bank Debit Mastercard® on and off with one tap – a convenient feature when traveling or for those times the card was left at a restaurant or waiting to be found under the sofa cushions.
- Receive real-time alerts for debit card transactions to quickly detect unauthorized activity.
- Set card to deny transactions that take place outside of a predetermined geographic range.
- Set spending limits. Consumers could use this feature with children who have access to a debit card. Business card holders could use this feature with employees.
- Provide easy budgeting controls for regular purchases like gasoline or groceries.
- Monitor card activity by category, such as gas stations and restaurants.
- Monitor card activity by transaction type (i.e. in-store, e-commerce and ATM).
- Block transactions for certain merchants or transactions types.
